Declaration of Contamination of Devices and Components

202404

Due to the legal obligations, we can accept devices and components for calibration or repair only if these are not contaminated or the contamination is safe and this declaration is correctly and completely filled out and signed by a person authorized to do so.

Condition of the Devices and Components

Were the devices and components in service? ☐ YES ☐ NO
Are the devices and components free of harmful substances hazardous to health? ☐ YES ☐ NO
Are the devices and components free of PWIS (Paint-Wetting Impairment Substances)? ☐ YES ☐ NO

If the devices and components are contaminated

The contamination is:

☐ harmless ☐ corrosive/caustic ☐ toxic, biological, carcinogenic, radioactive, otherwise harmful

We can only accept contaminated devices and components in case of proof of a correct cleaning.

Risk of Transport, Insurance, Packaging, Delivery, Calibration Capability

We assume that the devices are calibrateable. If this is not the case, we ask for your understanding that we have to charge an expense lump sum of 160 € per device.

Please bear in mind that all our deliveries and services are in principle ex works. Liability on our part for damage or loss both for the reception of the devices and components as well as for their return shipment is expressly excluded.

We offer an insurance of the return shipment of devices and components on your account equivalent to the value declared by you. This service is only offered for return shipment by UPS (United Parcel Service) or by forwarding agency. If UPS is chosen, the costs will be national 0.5% and international 1.0% of the declared value respectively. If the shipment is returned by a forwarding agency, you are asked for a request of the individual costs in each case. If there is no value declared in the following, the shipment will be returned without transport insurance.

Value to be declared for the return shipment, max. 50.000 EUR: _____ EUR

In case of damage or loss of transport, please inform us immediately. Any externally visible damage should be confirmed by the carrier. In particular also make sure that in case of damage the devices and components, including packaging, may be inspected at your site.

In the normal case, we will return the devices and components in the same packaging we have received from you. Whether this packaging is appropriate or suitable for the devices and components is not assessed by us in this case. In this case, a liability for unsuitable packaging during return transport is excluded.

Delivery of your equipment by means of freight forwarding with more than 30 kg can only be accepted via trucks (unloading by loading ramp or lifting platform on the vehicle). The unloading of freight from small transporters (parcel service vehicles) is only possible after consultation!

Please bear in mind that your order can only be processed once this declaration is available!

Confirmation of the declaration of contamination and of the value to be declared for the return transport:
