**Declaration of Contamination of Devices and Components**

Due to legal regulations we only accept equipment and components intended for calibration and repair, which are not contaminated or the contamination is quite harmless, and if this declaration is filled out correctly and completely and it is signed by a authorized person.

**Condition of the devices and components**

Have the devices and components been operated?

YES  NO

Are the devices and components free from harmful substances?

YES  NO

**If the devices and components are contaminated. The contamination is:**

harmless  corrosive/caustic  toxic, biological, carcinogen, radioactive, other pollutants

We can accept unsafely contaminated devices and components only if a confirmation of a correct cleaning is available.

**Risk of Transport, Transport Insurance, Packaging, Delivery**

Please bear in mind that all our deliveries and services are carried out ex works in principle. We exclude any liability for damages or loss for both the incoming devices and components as well as for the return shipment explicitly.

We offer an insurance of the return shipment of devices and components on your account equivalent to the value declared by you. This service is only offered for return shipment by UPS (United Parcel Service) or by forwarding agency. If UPS is chosen, the costs will be national 0.5% and international 1.0% of the declared value respectively. If the shipment is returned by a forwarding agency, you are asked for a request of the individual costs in each case. If there is no value declared in the following, the shipment will be returned without transport insurance.

Value to be declared for the return shipment, max. 50.000 EUR: \_\_\_\_\_ EUR

In case of a damage with transportation or of any loss please inform us immediately. Any externally visible damage should be confirmed by the carrier. In particular also make sure that in case of a damage the devices and components including packaging may be inspected at your site.

Normally the devices and components will be returned with the same packaging in which we received them. In such cases, we will not make any judgement whether the packaging of the devices and components is appropriate or suitable or not. Any liability for improper packaging of the return shipment is excluded in this case.

A delivery of your truckage goods with more than 30 kg is only possible with trucks (unload via truck loading ramp or truck with elevation platform). Unload of truckage goods from vans (small package service vans) is not possible!

**Please bear in mind that your order can only be dealt with if this declaration is available!**

Confirmation of the declaration of contamination and of the value to be declared for the return transport:
